Surat, Gujarat

OBJECTIVE

Full Stack Developer with **1+ year** of production experience building scalable web platforms using **Next.js** and **React**. Independently architected and deployed multiple live platforms — including a **gaming platform with 1,000+ daily users**, a **geolocation-based digital addressing system**, and a **spiritual audio streaming platform**. Proficient in PWA development, multi-language localization, Google AdSense integration, REST API development, SEO optimization, and performance engineering.

EDUCATION

Full Stack Development <i>Simba Institute — Certified Full Stack Developer</i>	2023 – 2024 Surat, Gujarat
Higher Secondary Certificate (HSC) <i>Akhand Anand Vidhya Bhavan</i>	2022 – 2023 Surat, Gujarat — 74%

PROFESSIONAL EXPERIENCE

Full Stack Developer <i>Include Technology</i>	May 2025 – Present Surat, Gujarat (Onsite)
- Independently built and deployed 4+ production web platforms using Next.js and React, serving real users across gaming, geolocation, and content domains. - Architected and implemented a multi-language localization engine using LibreTranslate API with a custom-built script that auto-analyzes files, translates metadata and page content, and generates/updates JSON language files — supporting 12 languages. - Integrated Google AdSense from scratch and implemented PWA (Progressive Web App) features including push notifications and offline support, enabling app-like installation on mobile devices. - Achieved significant Lighthouse performance improvements — desktop score raised from 90 to 100 and mobile from 65 to 80 through code splitting, lazy loading, image optimization, and caching strategies. - Engineered scalable UI component systems using Tailwind CSS and shadcn/ui, and integrated REST APIs for dynamic data rendering across high-traffic platforms. - Contributed to a client project (Innvolution) for 6–8 months, building new pages and enhancing existing features on a production corporate website for Asia’s leading Cath Lab manufacturer.	

KEY PROJECTS

Online Game Platform onlinegameweb.com	Include Technology
- Built a full-featured browser gaming platform from scratch with 15+ game categories including Puzzle, Brain/Logic, Word, Skill, Kids, Board Classics, Memory, Math, and more. - Developed a custom multi-language system using LibreTranslate API — engineered a script that scans, translates, and updates metadata and content into 12 language JSON files automatically (English, Spanish, Portuguese, French, German, Chinese, Italian, Dutch, Polish, Turkish, Filipino, Russian). - Implemented PWA with push notifications and offline support, allowing users to install the platform as a native-like app on mobile and desktop. - Integrated Google AdSense independently from scratch for platform monetization. - Boosted Lighthouse scores from 90→100 (desktop) and 65→80 (mobile) through advanced performance engineering; platform serves 1,000+ daily active users. <i>Tech Stack: Next.js, React, Tailwind CSS, LibreTranslate API, PWA, Google AdSense</i>	
My Digital PIN mydigitalpin.com	Include Technology
- Independently built the complete frontend and backend of a geolocation-based digital addressing platform inspired by India Post’s DigiPin system, covering the entire country with 4×4 meter location accuracy. - Implemented an interactive map interface with real-time geolocation, DIGIPIN generation, QR code creation, and instant sharing via WhatsApp, SMS, and Email.	

- Built **offline-first functionality** — the app fully operates without internet using open-source grid logic, making it accessible in rural and low-connectivity regions across India.
- Developed **business listing and discovery** features, favorites management, and location history tracking for end-to-end user utility.
- *Tech Stack: Next.js, React, Tailwind CSS, Node.js, REST APIs, Geolocation API, QR Generation*

Bhakt Chintamani | bhaktchintamani.com

Include Technology

- Built a **Gujarati spiritual audio streaming platform** featuring a fully custom-built audio player with **progress tracking, bookmarks**, and chapter-based navigation across the complete BhaktChintamani collection.
- Implemented **SEO-optimized architecture** with structured metadata, Open Graph tags and Twitter cards.
- Configured **Google Tag Manager** and analytics for user behavior tracking and performance monitoring.
- *Tech Stack: Next.js, React, Tailwind CSS, Custom Audio Player, SEO Optimization, GTM*

Innovation | innvolution.com — Client Project

Include Technology

- Contributed for **6–8 months** to the production website of **Asia's most awarded Cath Lab manufacturer**, specializing in Cardiovascular and Respiratory care solutions.
- Built new pages and improved existing sections, enhancing **UI consistency, performance, and usability** across the corporate platform.
- *Tech Stack: React, Tailwind CSS, GSAP*

TECHNICAL SKILLS

Frontend: Next.js, React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, shadcn/ui, MUI

Backend: Node.js, REST APIs, Express.js

Performance & SEO: Lighthouse Optimization, Core Web Vitals, Lazy Loading, Code Splitting, Metadata, Sitemap

Tools: VS Code, Postman, Google Tag Manager, Google AdSense

DevOps & CI/CD: Git, GitHub, Vercel, GitHub Actions, Docker

Specialized: PWA Development, Push Notifications, Multi-Language Localization (LibreTranslate API)

Soft Skills: Problem Solving, Self-Learning, Team Collaboration, Adaptability, Presentation
